SATYA BONDA

Principal AI Engineer | Principal Agentic AI Architect | Forward Deployed Engineer — Multi-Agent Systems · Enterprise AI Platforms · MCP · RAG · LLMOps · Evaluation-Gated Delivery · Responsible AI · Azure & AWS
Bengaluru, India · +91 7204694051 · bonda.career@gmail.com
Portfolio: git-bonda108.github.io · linkedin.com/in/bondagenai · github.com/git-bonda108

SUMMARY

Principal AI Engineer and agentic AI architect taking enterprise workflows from first call to governed production: multi-agent systems on MCP, deterministic code where money moves, and evaluation harnesses that gate every release and re-test production nightly. 25+ agentic systems; 23 years in enterprise technology, 18 leading delivery.

CORE COMPETENCIES

Agentic AI architecture · multi-agent orchestration (LangGraph, Agents SDK) · Model Context Protocol (MCP) & A2A · context engineering · RAG & hybrid retrieval · evaluation harnesses & LLM-as-a-Judge · guardrails, governance & Responsible AI · Azure AI Foundry · Amazon Bedrock · LLMOps · program & stakeholder leadership.

SKILLS

Agentic AI & Multi-Agent Orchestration: Agentic AI, multi-agent systems, supervisor–worker, handoff meshes, generator–critic, fan-out/fan-in, ReAct, tool calling, human-in-the-loop, checkpointing, model routing, verifier gates.

Claude Architecture (CCAR-P domains): agentic solution design; model selection, context engineering, prompt caching; MCP integration; evaluation and optimization; governance and safety; Claude Code, Claude Agent SDK, hooks, CI/CD.

Frameworks & Protocols: Model Context Protocol (MCP), FastMCP, A2A, LangGraph, LangChain, OpenAI Agents SDK, CrewAI, AutoGen, PydanticAI, Microsoft Agent Framework, LiteLLM, FastAPI, TypeScript, Streamlit.

GenAI & Retrieval: RAG, GraphRAG, agentic RAG, hybrid search (BM25 + vector), reranking, embeddings, vector databases (Pinecone, pgvector, FAISS, ChromaDB, Azure AI Search); fine-tuning (LoRA, QLoRA, DPO).

Evaluation, Observability & Reliability: Evaluation harnesses as release gates, golden datasets, LLM-as-a-Judge, adversarial suites and red teaming, RAGAS, DeepEval, LangSmith, OpenTelemetry, drift detection, canaries.

Machine Learning & Cloud: Python, SQL, PostgreSQL, PyTorch, TensorFlow, scikit-learn, XGBoost, Transformers; Amazon Bedrock, AgentCore, ECS Fargate, Lambda; Azure Container Apps, Key Vault, Entra ID.

Microsoft Agentic AI (AB-100 · AI-103 · TITAN): agentic-first and multi-agent solution design; Azure AI Foundry (Foundry Models, Tools, Agent Service); Copilot Studio and Microsoft 365 Copilot agents; Dynamics 365, Power Platform; Agent 365 governance; Fabric IQ data agents; Responsible AI Standard; ROI and ALM.

LLMOps / MLOps & CI/CD: MLflow, CI/CD for models and APIs, Kubernetes, Docker, Terraform/Bicep, AWS CDK, GitHub Actions, scalable serving, blue/green deploys.

AI Security, Responsible AI & Governance: Responsible AI, EU AI Act, PII/PHI redaction, Content Safety, prompt-injection defense, OWASP LLM Top 10, Managed Identity, SSO, role-based access, audit trails.

AI Product & Leadership: AI product management, AI strategy, executive communication, AI adoption and ROI.

CERTIFICATIONS

Anthropic Claude Certified Architect – Professional (CCAR-P), 2026 · Microsoft Agentic AI Business Solutions Architect – Expert (AB-100, 2026) · Microsoft Azure AI Apps & Agents Developer Associate (AI-103, 2026) · Microsoft TITAN Frontier Transformation Engineer (2026).

Also: PMP, PMI-RMP, CSM, SAFe POPM, ITIL V3, Azure Solutions Architect Expert, AWS Cloud Practitioner, Oracle GenAI Professional, Oracle ML Associate.

EXPERIENCE

Principal AI Engineer

Independent AI Consultant · Bengaluru, India · Mar 2026 – Present

- **Microsoft Agentic AI Hackathon (Oct 2026, via Fusion5):** four Foundry agent builds, all scored 100/100.
- **Copilot adoption:** built the hub for a Microsoft 365 Copilot rollout (release train, plan, actions, catalog).
- **AI training:** EY and PwC cohorts (Aug–Sep 2026), 20+ participants, 4.7/5 feedback. · Training app

Enterprise AI Playground — Solo-Built Governed Agentic AI Platform · Live · Repo · Portfolio

- **What it does:** one governed place to try 30 models (11 providers), build and run agents, and see every dollar.

- **How it works:** FastAPI gateway with LiteLLM routing; identity, role, budget and key checks before every call and a cost-ledger row after it; LangGraph runs that pause for human review; 175 blueprints, 7,500 MCP servers.
- **How it is proven:** a five-level evaluation ladder (Draft → Production) with judge rubrics and nightly canaries.

Flick — Autonomous Invoice Reconciliation (LangGraph · MCP · Claude · Azure) · Apr – May 2026

- **What it does:** replaces 30–90 minutes of analyst work per supplier invoice (proving each line against contracts, POs and meter data) with a Teams chat for a pest-control multinational; in pilot, 1,200 invoices a month at 87% first-pass, 4.2 min vs 47 manual.
- **How it works:** a LangGraph manager routes typed state through Parser (40+ formats, F1 0.94), Matcher, Anomaly Detector, Reconciler and Reporter over five MCP servers; a Critic on a second LLM vendor rejects uncited claims; green auto-posts, amber goes to analysts, red drafts a dispute a human releases.
- **How it is proven:** a 200-invoice analyst-labeled golden set gates every change overnight (matcher precision@1 0.91; anomaly false-positive rate 3.1% at 95% recall); 5% canary with auto-rollback.

Compass — Live Dynamics 365 Agent (Azure AI Foundry · MCP · Copilot Studio) · Jun 2026 – Present

- **What it does:** staff ask about orders, stock, balances or store procedures in plain English and get a cited, company-scoped answer from live Dynamics 365 F&O in Teams, web, MCP tool packs and D365 Agent Factory.
- **How it works:** a schema-constrained GPT-4.1 planner over 39 read-only OData entities plus Azure AI Search over the business's own SOPs; every figure computed in code; access never exceeds the user's F&O role.
- **How it is proven:** an 88-case battery and an LLM judge (95% human agreement) test production nightly; functional packs green every night since Sep; red nights auto-file GitHub issues; 12 OWASP adversarial cases.

Quote Intelligence — Fabrication-Proof Quote Comparison (Agents SDK · MCP · React) · Apr 2026

- **What it does:** turns two builder quotes into a cent-exact, source-traced comparison in minutes, not half a day.
- **How it works:** page-anchored extractors, alignment, ambiguity flagging and a different-model verifier feed a pure-code tripwire checking each snippet against its cited page; Decimal math; unconfirmed rows block the total.
- **How it is proven:** 63 assertions in four suites (26 adversarial) on every change, zero fabricated figures; verified end-to-end on a live customer job (57 rows, 26 ambiguities flagged).

AI Program Manager / Agentic AI Architect

Insight Global · Bengaluru, India · May 2024 – Feb 2026

- **Fortune-100 AI programs:** led an 8-person GenAI team running four AI programs for a Fortune-100 Credit & Collections organization (payment insights, bot store, agentic co-worker); 2× accounts under AI, 71% utilization, $220M collected.
- **SOX 404 agentic co-worker (prototype to MVP):** a validation plan authored once per control, run identically every period; no claim ships without cited evidence; golden-set evals and SME gates; proven on three controls.
- **Enablement:** agentic AI cohorts at EY; long-form GenAI/ML programs for Bristlecone (6 mo), National Grid (12 mo), Navikenz (5 mo); leader and C-suite tracks.

EARLIER EXPERIENCE

Wipro | Project Manager / AI Engineer · Scrum Master · Azure Solutions Architect · Jul 2021 – Apr 2024

- **Product ownership:** owned the Oracle CPQ/MDM roadmap; deployed Oracle CPQ and integrated it with Salesforce; MDM modernization saved ~$900K a year and 3 FTE.
- **Delivery leadership:** led the Agile team for the Oracle CPQ implementation; directed the Oracle EBS and Primavera migration to OCI; built Python/Jupyter ETL pipelines into Dynamics 365.
- **GenAI and ML engineering:** conversational RAG assistant (LangChain, FAISS, GPT-4), natural-language SQL engine (Azure OpenAI, Hugging Face, Streamlit), LLM fine-tuning (MarianMT, BLOOM LoRA; BLEU, COMET).
- **AI Hackathon 2024 winner:** brand-voice compliance app — GPT-4 analysis against brand guidelines with recommendations.

Carrier (short-term contract) | Project Manager · Feb – May 2024: Oracle EBS separation for the Carrier LES organization — Kinaxis and LeanDNA integrations across Boomi, Oracle EBS and Snowflake.

Trane Technologies / Ingersoll Rand | Project Manager & Agile Coach · Jun 2015 – Jul 2021

Oracle 19c upgrade under budget (AOP 2020); zero-disruption ERP separation through the company split (President Award); promo-claims program, CSAT +40%; coached Scrum teams through the Agile transition.

Volvo | IT Project Manager · 2013 – 2015 · Oracle | Project Management Consultant · 2011 – 2013

Volvo: ITSM alignment, service reliability +35%. Oracle: portfolio financial models (CapEx/OpEx, NPV, ROI).

IBM | Project / Operations / Transition / Quality · Jan 2007 – Apr 2011

Transition Manager for 12–20 FTE service desks across 4 clients; PM for data-center migration and app hosting; Operations Manager for 5 helpdesk accounts, 55 direct reports; audits and compliance.

Genpact | Process Leader · Dec 2005 – Jan 2007 · HP | Quality Specialist · Jan 2004 – Nov 2005

Led global technical-support analyst teams (Genpact); built the partner QA feedback and certification process (HP).

PROJECT PORTFOLIO — SOURCE CODE AND LIVE DEMOS

Bedrock Agentic RAG — Self-Correcting RAG on AWS (LangGraph · Amazon Bedrock · MCP)

LangGraph agent on Amazon Bedrock that grades its own retrieval, rewrites missed queries and checks groundedness; S3 Vectors + BM25 with RRF and Bedrock Rerank; auto-scaling ECS Fargate, AWS CDK; eval-gated CI/CD (hit@5 1.00, MRR 0.94); MCP server. Repo

IQR — Agentic Audit-Evidence Validation (Azure AI Foundry)

Multi-agent SOX-control validation with a blinded verifier and citation-gated verdicts; five-gate eval harness (defect recall, false exceptions, citation validity, abstention, reproducibility) at 100% stability; per-seat model routing. Repo

Dentsi — Autonomous AI Front Desk (Multi-Agent Voice AI)

Six-agent voice front desk: GPT-4 orchestrator, 18-tool loop for caller ID, triage and scheduling (Twilio, ElevenLabs, Deepgram, NestJS); HITL escalation; PHI consent logging. Repo · Live

AI Sales Enablement Platform (MCP Server Federation)

CRM, analytics, RAG and training capabilities as four MCP servers (~20 tools) behind a FastAPI gateway; Streamlit console and Next.js dashboard; transcript pipeline feeding the RAG layer. Repo · Live

Autonomous Document Anomaly Detection (Multi-Agent Pipeline)

Ingests leasing contracts, invoices and POs; flags anomalies with per-finding confidence; dual-orchestrator, parallel processing, confidence-thresholded review gate; anomaly F1 0.72 → 0.91. Repo · Live

Supply Chain Intelligence Platform (Multi-Agent Handoff Orchestration)

Six-agent Agents SDK platform: orchestrator handoffs to risk, demand, supplier, inventory, logistics and reporting specialists over 15 deterministic calculators; model-free computation; e2e suites. Repo · Live

PMO CoPilot (Twelve-Agent Handoff Mesh)

Twelve-agent Agents SDK portfolio assistant: orchestrator handoffs to eleven specialists (status, EVM, risk, scheduling, resources, reporting); deterministic CPI/SPI; ML risk predictions. Repo · Live

EDUCATION

Master of Computer Applications (MCA) — Periyar University, 2003

B.Sc. Physics (Hons.) — University of Calcutta, 1999
